Sea Kayaking in the San Juans

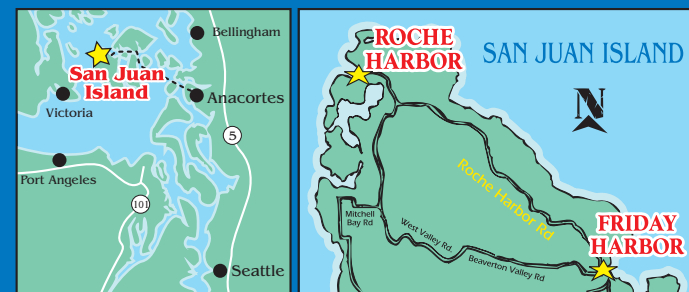

Our islands create the perfect conditions for sea kayaking. Our guides are trained to study these conditions and provide you with a wonderful, safe adventure. When you come with us, we promise to do our best to match your skill level, time constraints, & physical ability with the trip that is right for you. If someone over-states the likely hood of whale interaction, please remember, whales can swim up to 30 mph and the best kayaker can reach 3 mph. We suggest that if whales are your goal, book one of our whale watching tours with one of our two vessels. Our success rate is over 90%.

On our kayak tours, we see whales as often as and sometimes more frequently, than other operators. Our goal is for you to escape from the ordinary. San Juan Safaris prides itself in providing small groups with outstanding adventures.
